PROFILE

Innovative developer, goal-oriented, and cooperative student with experience in Finance, Healthcare, and Inclusive technology. Proficient in a diverse range of technologies, Programming languages, Frameworks, and Development tools. Also, passionate about learning, growing, and contributing more to society using technology.

EMPLOYMENT HISTORY

Software developer at Inclusive media and design centre, Toronto Metropolitan University., Toronto

May 2022 — Present

- Designed and implemented applications following the MVVC and OOP architectural pattern, ensuring separation of concerns and maintainability.
- Developed and maintained patient-centered health and wellness mobile and web applications using React Native, Native Android, node.js, JavaScript, Typescript, CSS, HTML, and CLE.
- Implemented sentiment analysis through IBM Watson and features such as MongoDB connectivity and Google authentication that boosted the overall application's efficiency.
- Worked with stakeholders to gather requirements, provided required technical solutions, and connected with designers, developers, healthcare professionals, patients, and managers through collaborative applications(GitHub, Trello, and more).

Intern at United Bank for Africa, Lagos,Nigeria

May 2017 — August 2018

- Assisted with the identification and resolution of technical issues or bugs in applications and systems.
- Participated in the design, development, testing, and deployment of software products and solutions.
- Conducted research on financial markets, products, and trends to support senior staff.
- Assisted with data entry, filing, and other administrative tasks.
